ABSTRACT

A follow-up study of 53,045 occupational curriculum students who left North Carolina community colleges in 1979-80 was conducted to obtain information on students' current employment or educational status, reasons for attending and leaving the colleges, and students' evaluations of the education and services provided. Responses to the 22-item questionnaire were received from 46.1% of the students surveyed, with higher rates of response obtained from females, whites, older students, graduates, and two-year technical students. In addition to revealing a very high rate of satisfaction with the training received, the study indicated that: (1) 56.5% of the respondents and 70.6% of the graduate respondents were in jobs related to their field of training; (2) 80% of the respondents felt they were meeting their objectives; (3) 15.5% were currently enrolled in an educational program; (4) 80% of the respondents had attended college to train for an occupation or to improve job skills; (5) 77.2% of the respondents were employed; (6) salaries for full-time employees averaged $6.18 per hour; (7) only 7.5% of the respondents were dissatisfied with their educational experience; and (8) the most common areas of employment were business administration, secretarial work, nursing, accounting, and welding. The bulk of the report is made up of data tables presenting survey findings about graduates, early leavers, and dropouts. The questionnaire is also included. (HB)

FOLLOW-UP STUDY OF 1979-80 STUDENTS
N.C. Community College System

Some 53,045 curriculum students (graduates, early leavers, and drop-outs) who left the institutions during the 1979-80 school year were surveyed during the summer of 1981. This study represented all curriculum students with the exception of general education and college transfer students. Of these 53,045 students, responses were received from 24,441. Included in the 53,045 students were 11,681 graduates from whom 6,956 responses were received. The overall response rate was 46.1% for all students and 59.5% for graduates--a very good return for a follow-up study. This study is the largest of its kind to be conducted in the United States. (Total cost for the project excluding permanent staff was $43,885.)

While the literature indicates that non-respondents tend to respond similarly to respondents, greatest differences usually exist in demographic characteristics of those who respond compared to those who do not. In this study slightly greater rates of response were obtained from females, whites, older students, graduates, and two-year technical students. While these differences are slight, still no attempts have been made to ascertain the views of the non-respondents.

Notable among the results was the high satisfaction of the students with the services offered in the system. Only 4% of the students rated occupational training below average. Additionally, more than half the students who attended and more than 70% of the graduates said the training they received at the institutions is related to their present occupation. Nearly 80% are meeting their objectives; however, of those who fail to meet objectives, less than 5% indicated dissatisfaction with the institution. Most of the students who failed to meet their objectives plan to continue to pursue them. The data appears to indicate a need for better placement services, additional financial aid, and more flexible scheduling for curriculum students.

Copies of each institution's results have been provided to the institution presidents. These results should help them plan and evaluate programs at their institution.

SUMMARY OF FINDINGS FOR 1979-80 FOLLOW-UP STUDY

ITEM A

About 40% of the dropouts, more than 30% of the early leavers, and 13% of the graduates intended only to take desired courses.

ITEM B

The primary objectives of all groups for attending were to train for an occupation and to improve job skills.

ITEM C

The majority of all three groups at least partially met their objective. Less than 5% of the graduates failed to meet their objectives.

ITEM D

The principal reasons for not meeting the objectives were: conflicting job hours, financial reasons, a change in educational goals, or the student obtained a job. None appear to be institutionally related.

ITEM E

Almost two-thirds are planning to continue to pursue their objective.

ITEM F

About 16% of all groups are continuing their education.

ITEM G

Of those attending, more than one-half are classified as either freshmen or sophomores and are attending part-time.

ITEM H

About two-thirds of these students are in the community college system with 18% in the public North Carolina university system.

ITEM I

Students rated the preparation to continue their education as "good."

ITEM J

Overall, more than 77% were employed with 82.8% of the graduates being employed.

ITEM K

More than four-fifths of the students were employed prior to enrollment. Almost one-half of these were in similar work.

ITEM L

The average salary of all students responding was $6.18 per hour; graduates, $6.01; early leavers, $6.10; dropouts, $6.31.

ITEM M

Most worked about a forty-hour week.

ITEM N

The most prevalent job codes were secretary, registered nurse, wholesale and retail trades supervisor, production work supervisor, licensed practical nurse, teacher aide, bookkeeping and accounting clerk and auditing clerk, general office clerk, and machine operator and tender.

ITEM O

Almost 50% of the dropouts, almost 54% of early leavers, and 71% of the graduates reported their training was related to their work.

ITEM P

Early leavers and dropouts reported lack of qualification as a major reason for training not being related to their job, while graduates cited lack of jobs in their field as their major reason for unrelated jobs.

ITEM Q

All groups rated their occupational training as "good" or "very good."

ITEM R

Most of the students in the survey (94.1%) are employed in North Carolina.

ITEM S

A total of 17.5% of the students agreed to have questionnaires sent to their employers. These questionnaires have been mailed to the employers.

ITEM T

The students indicated satisfaction with the total education experience provided by the community college system. Only 7.5% were disappointed with their experience.

ITEMS U AND V

Items U and V were rated from "average" to "good" in all categories. "Library services" was viewed most favorably, while "placement services" was ranked least favorable.

ATTACHMENT B

This attachment provides the placement rates by curriculum in rank order of those students who responded to the survey. More than 100 curricula had placement rates greater than 50%.

Attachment C

Average salaries by curriculum are shown in rank order in this attachment. More than 100 curricula had more than a $6.00 per hour average salary.
